

SUNNDAL BOD

Monteringsanvisning

- Krever 2 personer og ca 2-3,5 timer å montere
- Enkel montering
- Forsterkede vegger

Før du begynner

Monteringsanvisningen

Les hele monteringsanvisningen før du begynner. Viktig informasjon og tips kan gjøre monteringen enklere.

Følg punktene i monteringsanvisningen nøye. Monteringen krever 2 personer.

Deler

Sjekk at alle delene er der og gjør deg kjent med dem ved å sammenligne med delelisten. Noe ekstra festemateriell er inkludert.

ANBEFALT VERKTØY

Bruk egnede arbeidshansker pga skarpe metallkanter

PLANLEGGING

**Monteringen krever
2 personer**

Værforbehold:

Velg en dag uten nedbør.

IKKE monter i sterk vind pga fare for skade på deler og mennesker. Vær forsiktig om underlaget er vått eller glatt.

Teamwork:

Dersom én person tar seg av delene og den andre festemateriell og verktøy, går monteringen enklere og raskere.

Valg av plassering

- Unngå overhengende trær, da greiner kan falle ned og skade boden.
- Små trær, busker, gjerder o.l. i nærheten er ok, og kan fungere som ly for boden.

Forberedelser

Sørg for at underlaget der boden skal plasseres er rett og i vater. Dersom underlaget har fall, må fallet lede vannet bort fra boden og ikke mot den.

Man kan med fordel ha et fundament i betong eller treverk som hindrer at det kommer fukt inn i boden. Pass på at fundamenter i betong er helt herdet før boden plasseres oppå. Bodene er ikke konstruert for plassering på gress/jord.

Bodene bør festes i underlaget med egnet festemateriell. Dersom du er i tvil, kontakt en faghandel.

TIPS:

- Det anbefales å være 2 personer under monteringen, da deler av monteringen krever flere for å få deler sammenmontert. 2 personer gjør også monteringen enklere og raskere.
- Studér monteringsanvisningen nøye og beregn god tid.
- Sørg for å ha riktig verktøy tilgjengelig.
- Noen av delene kan ha skarpe kanter, og vi anbefaler bruk av hansker og egnede klær.
- Begynn med å pakke ut alle delene og sjekk at alle delene er der. Dekk underlag med papp eller plast om underlaget kan skrape opp delene.
- Sørg for at alle skruer strammes helt til. Sjekk at rammen er rett og i vater.
