Product

Product description:

Weberfloor 110 Fine is a normal-drying pumpable self-levelling compound for floors in housing, offices and public areas indoors. It is suitable as underlayment for most surface coverings such as tiles, vinyl flooring, linoleum flooring, floating parquetry and bonded multi-layer parquet. The product is moisture-resistant, slag and casein-free.

Product specification

The composition of the product is described in the following table:

Materials	%
Binder	15-30%
Aggregate	30-60%
Filler	20-50%
Additives	<2%

LCA: Calculation rules

Declared unit:

1 kg weberfloor 110 fine

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Technical data:

weberfloor 110 fine is designed, produced and CE marked according to EN 13813 $\,$

For further information, see www.se.weber/

Market:

Scandinavian countries

Reference service life, product

>50 years

Reference service life, building

>50 years

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

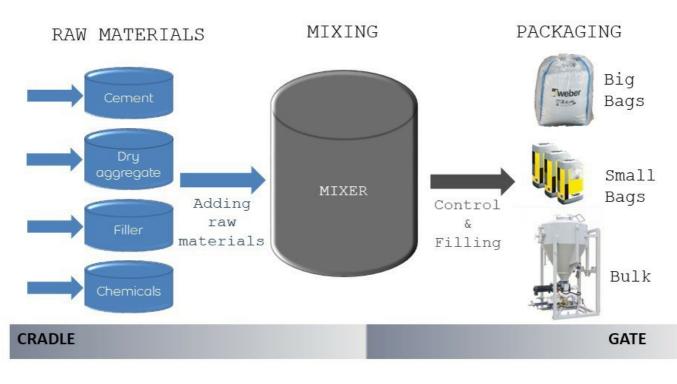

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Binder	EPD-BVG-20140073-IAG1-EN	EPD	2014
Cement	Supplier	EPD	2014
Additives	ecoinvent 3.4	Database	2017
Aggregate	ecoinvent 3.4	Database	2017
Filler	ecoinvent 3.4	Database	2017
Cement	Supplier	EPD	2019

System boundary:

All processes from raw material extraction to product transport to the construction site are included in the analysis (A1-A4). The flow chart below illustrates the system boundaries for the A1 to A3 part of the analysis.

Additional technical information:

The product is P-labeled by Research Institute of Sweden.

The consumption of the product is 1,7 kg / m² / mm.

The remaining powder and cured material may be disposed as construction waste to disposal or recycling.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transport to market (A4) is calculated based on the default distance of 300 km from NPCR 009

Transport from production place to user (A4)

Туре	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Unit	Value (I/t)
Truck	55,0 %	Truck, lorry over 32 tonnes, EURO 5	300	0,022823	l/tkm	6,85
Railway					l/tkm

Additional Norwegian requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Renewable electricity with Guarantee of Origin from LOS (kWh)	Modified ecoinvent 3.4	60,20	g CO2-ekv/kWh

Dangerous substances

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

Name	CASNo	Amount
Portland Cement	65997-15-1	0-10%

Indoor environment

The product meets the requirements for low emissions and odour (M1) by EN15251: 2007 Appendix E
