

FLEECE FILTER BAG 5 PCS ATTIX 30

Item no:
107419591

Description

Made of new fleece/polypropylene material, making them stronger than the paper bags. These bags feature higher air permeability for less performance loss than the paper bags. The fleece/polypropylene material also makes them stronger than the old paper bags and more resistant to damp material. Using bags in the vacuum cleaner will protect and extend the lifetime of the main filter, while making disposal easier and safer.

For dry use only, applicable for all types of dust and debris. Including hazardous dust in combination with a M- or H-Class rated vacuum cleaner. Intended use for ATTIX 30, ATTIX 3 and IVB 3.

Technical specifications and features

Material	100% synthetic fleece material made of polypropylene. The bag have two layers with a total weight of 110 g/m ² .
Filtration efficiency	99,99%
Classification	M-Class
Certification	IFA and NACS 2020 compliance
Washable	The bag is not reuseable
Food contact safe	No
Inlet type	PP with plug
Packaging	Cardboard box w. 4C artwork with hanger
Colli	4 Boxes
