

Characterized control valves, 2-way,
with internal thread

- for open and closed cold and warm water systems
- for modulating control on the water side of air-handling and heating systems
- air bubble-tight

Type overview

Type	k_{vs} [m ³ /h]	DN [mm]	Rp [Inches]	p_s [kPa]	n(gl) ¹⁾	S_v
R205K	0.25	10	3/8"	4140	3.2	>50
R206K	0.4	10	3/8"	4140	3.2	>50
R207K	0.63	10	3/8"	4140	3.2	>50
R208K	1	10	3/8"	4140	3.2	>50
R209K	1.6	10	3/8"	4140	3.2	>50

¹⁾ optimized in the opening range

Technical data

Functional data	Flow media	Cold and hot water, water with max. 50% volume of glycol
	Temperature of medium	+5°C ... +110°C ¹⁾ (lower or higher temperatures on request)
	Rated pressure p_s	see «Type overview»
	Flow characteristic	Control path A – AB: equal percentage (to VDI/VDE 2173) n(gl): see «Type overview»
	Rangeability S_v	see «Type overview»
	Leakage rate	Control path A – AB: Air bubble-tight (BO 1, DIN3230 T3)
	Pipe connector	Internal thread to ISO 7/1
	Differential pressure Δp_{max}	350 kPa (200 kPa for low-noise operation)
	Closing pressure Δp_s	1400 kPa
	Angle of rotation	90° \rightarrow (Operating range 15 ... 90° \rightarrow)
Installation position	Upright to horizontal (in relation to the stem)	
Maintenance	Maintenance-free	
Materials	Fitting	Forged, nickel-plated brass body
	Valve cone and stem	Stainless steel
	Stem seal	O-Ring, EPDM
	Ball seat	PTFE, O-Ring Viton
	Characterizing disk	TEFZEL
Dimensions / Weights	see «Dimensions and weights», page 3	
Motorizing	see the complete overview of water solutions	

¹⁾ The allowed media temperature can be limited, depending on the type of actuator. The correct values can be found in the corresponding actuator data sheets.

Safety notes

- The valve has been designed for use in stationary heating, ventilation and air conditioning systems and is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- It may only be installed by suitably trained personnel.
All applicable legal or institutional installation regulations must be complied with.
- The valve does not contain any parts that can be replaced or repaired by the user.
- The valve is not allowed to be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- The recognized rules should be applied when determining the flow characteristic of final controlling elements.

Product features

- Mode of operation** The characterized control valve is operated by a rotary actuator. The actuator is controlled by a standard modulating or 3-point control system and move the ball of the valve – the throttling device – to the opening position dictated by the control signal. Open the ball valve counterclockwise and close it clockwise.
- Flow characteristic** Equal-percentage characteristic of the flow rate ensured by the integral characterizing disc.

Installation notes

- Recommended mounting positions** The valve may be mounted either **vertically** or **horizontally**. It is not permissible, mounting the valve with the stem pointing downwards.

- Water quality requirements**
- The water quality requirements specified in VDI 2035 must be adhered to.
 - Characterized control valves are relatively sensitive control devices. In order to ensure a long service life, it is advisable to fit **strainers**.
- Maintenance**
- The characterized control valves and rotary actuators are maintenance-free.
 - Before any kind of service work is carried out on actuator sets of this type, it is essential to isolate the rotary actuator from the power supply (by unplugging the power lead). Any pumps in the part of the piping system concerned must also be switched off and the appropriate isolating fittings closed (allow everything to cool down first if necessary and reduce the pressure in the system to atmospheric).
 - The system must not be returned to service until the ball valve and the rotary actuator have been properly reassembled in accordance with the instructions and the pipework has been refilled in the proper manner.

- Direction of flow** The direction of flow, specified by an arrow on the housing, is to be complied with, since otherwise the ball valve can be damaged. Please ensure that the ball is in the correct position.

Accessories

- | | Description |
|-------------------------------|-----------------------------------|
| Mechanical accessories | Stem heating ZR24-1 ¹⁾ |
| | Pipe connector ZR23.. |

¹⁾ No stem heating is available for R2..K

Dimensions and weights

Dimensional drawings

DN [mm]	L [mm]	H [mm]	Rp [Inches]	L1 ¹⁾ [mm]	X ²⁾ [mm]	Y ²⁾ [mm]	Weight [kg]
