

## Declaration of Formaldehyde

Formaldehyde emission of CE-marked WISA®-Plywood is very low and measured values are below even the tightest national requirements.

When determined according to EN 717-2 (gas analysis method) the formaldehyde emission from uncoated exterior WISA®-Plywood is under 0,4 mg/(m<sup>2</sup> x h). That is significantly lower comparing to requirement in E1 class 3,5 mg/(m<sup>2</sup> x h).
