

Meaco AirVax Air Purifier

The Meaco Airvax will define the next generation of air purifiers as it represents a large leap forward for air purifier customers. There is no doubting the fact that the Airvax looks stunning and is a welcome addition to any home. But the Airvax is so much more than an beautiful looking gadget, it is an air purifier that creates a healthy living environment and has the potential to improve lives.

In independent tests the internationally patented Airvax Static Electricity Film Filter (SEFF) has proven its ability to remove from the air particles $<0.25\mu\text{m}$ (in fact catching particles as small as $0.1\mu\text{m}$ is possible). As well as dust particles the SEFF can remove smells, moulds, virus, carbon monoxide, tobacco smoke, car exhaust gases, allergens, formaldehyde, toluene, benzene, pollens, germs and bacteria. A list of irritants that is hard for any other air purifier to beat, especially at this price point.

The Airvax also saves you money because power consumption is just a maximum of 5 watts and the filter has an effective life cycle of up to three years.

If you need a healthier living environment either at work or at home then the Airvax is the next generation air purifier for today's generation.

- ✓ Unique internationally patented design
- ✓ Catches dust, smoke, bacteria, moulds, smells and VOCs
- ✓ Catches smaller particles than a standard HEPA filter
- ✓ Removes carbon monoxide
- ✓ Does not create any Secondary Hazardous Substances
- ✓ Filter replacement interval up to 3 years
- ✓ 3 speed fan with near silent operation
- ✓ Low running costs at a maximum of just 5 watts

“At last an air purifier that not only looks fantastic it also maintains a healthy living environment.”

“We have taken a very long time to put our name to an air purifier, our speciality is dehumidifiers and for us to endorse an air purifier it would have to be very, very special. We have always been a bit disappointed with most air purifiers because they might have exceptional claims but they rely on customers regularly buying new filters and this becomes an expensive on going cost and then the customer stops buying new filters and the air purifier is no longer as effective as the manufacturer would like. When we first saw the Airvax we were blown away with it's looks. When we tested it we soon realised that there is a lot more to this air purifier than just it's looks and we have here something very, very special. Something that it truly worthy of the Meaco name.”

Chris Michael – Director and Co-Founder of Meaco (U.K.) Limited with over 20 years experience in air treatment.
