## Plasson Serie 1

Den nye kompakte koblingen

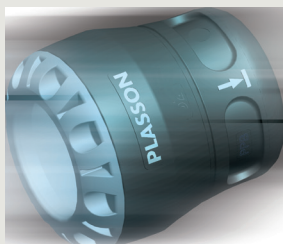

Teknisk katalog

2015

Global Presence - Local Commitment

**PLASSON**<sup>®</sup>

Plasson Serie 1 - Den nye innovative serien med koblinger fra Plasson, markedsleder innen plastkoblinger for rørsystemer i PE.

Plasson Serie 1 - Koblingene gir mulighet for å koble PE rør til andre typer materiale slik som kobber, polybutylene, PVC og PEX.

Plasson Serie 1 - Koblingene er designet for max 16 bar driftstrykk. Ved å føre røret inn til stopp punktet har man oppnådd både en strekkfast og tett kobling.

Plasson Serie 1 - Med sitt kompakte og attraktive design er koblingene ideelle for rørleggere, blant annet når begrenset plass er avgjørende. Den enkle monteringen gjør at både profesjonelle og de som ikke bruker koblingene så ofte får en enklere jobb, samtidig beholder man påliteligheten til Plasson koblingen.

Kombinasjonen av Plasson's nåværende utvalg og den nye Serie 1 oppfylder markedets krav hvor PE rør kobles mot andre typer rørmaterialer.

Plasson Serie 1 gir mange muligheter og fordeler:

- Estetisk høyverdige produkter - profesjonelt utseende
- Ingen verktøy er nødvendig for montering - enkel "push fit" montering
- Kompakte deler - gjør det enklere å montere når plass er en begrensning
- Koblingen tetter umiddelbart - maksimal pålitelighet
- Integrert pakning i pakningsspor - ingen muttere å stramme
- 100 % strekkfast kobling
- Overgang fra PE utendørs til innendørs rørsystemer - kobber, PB, PVC og PEX tilpasset i en kobling
- Designet for å holde i minimum 50 år - gir påliteligheten du trenger som rørlegger og fagmann
- Kompakte koblinger gir mindre krav til lagerplass

## Tekniske spesifikasjoner

### Materialer

#### Koblinger

Kropp: Polypropylen

Mutter: Polypropylen

Split ring og gripe ring: Acetal (POM)

Støttehylse: Acetal (POM)

Pakning: Nitril gummi (NBR)

Forsterkende Ring: Rustfri stål ring som utvendig forsterkning på alle koblinger med innvendige gjenger 1¼" til 2"

#### Gjengede koblinger

Kropp: Polypropylen

Forsterkende ring: Rustfritt stål

Messing gjenger: DZR, avsinkningsfri messing

### Temperaturer

Koblingene skal ikke brukes i varmtvanns-applikasjoner. Koblingen tåler minusgrader.

### Kjemisk motstand

Plasson Serie1 koblinger kommer med polyacetal split - og gripe ringer som standard samt NBR pakninger som er egnet for vann.

### Trykk og sertifikater

Plasson deler/koblinger fra 20-63mm er testet og godkjent i følge ISO 14236 opp til PN16. Serie 1 innehar produktgodkjenning fra Sintef.

### Gjenger

Alle gjenger samsvarer med ISO-7/1, BS 21, DIN 2999, NEN 3258, AS 1722 Del 1.

Alle utvendige gjenger er koniske.

Alle innvendige gjenger er parallelle.

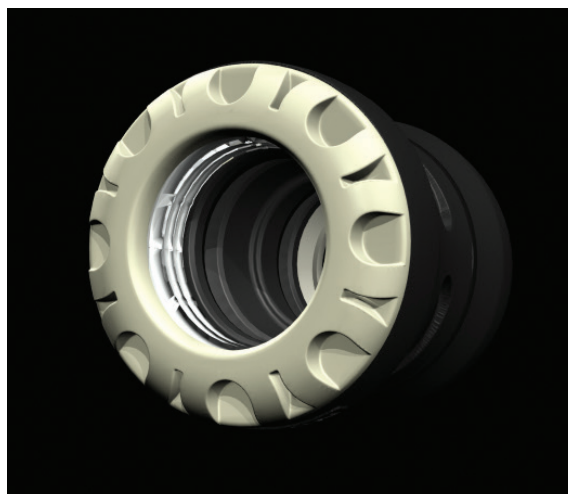

### Forkortelser

AP	Antall i pose
AK	Antall i kartong
V	Vekt i gram
	Tilgjengelig i løpet av 2015

### Generell informasjon

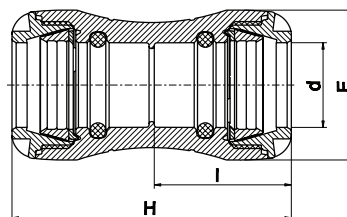

Før installasjon, vær sikker på at enden på røret som skal inn i koblingen ikke er ripete eller på andre måter ødelagt, og at røret og rigg/jigg er fri for sand, søle og steiner etc. Hvis man gjenbraker koblingene så må man være sikker på at tennene på split - og gripe ringen er inntakte og at tennene er "skarpe" slik at de "biter" på røret, dette for å hindre at rørene blir dratt ut av koblingene.

Vi vil sterkt anbefale å bruke PTFE tape på gjengekoblinger. For diameter 40mm og større, vil fasing og smøring av røret gjøre at det blir enklere å sette inn røret (bruk silikonbasert smøring).
